

The Ecosystem Litepaper

Portuguese Version

Byron Labs has created an ecosystem that will change the way you view blockchain projects.

Innovation and practicality for all types of users, choose from 7 options to invest and negotiate, without having to spend hours of research to find good projects and avoid scams.

Byron Labs does the difficult part for you, now just take advantage of the ecosystem and take advantage of what blockchain has to offer: profits.

BYRON CEX

BYRON CEX is designed to have **CHEAP LISTINGS** and **FUTURES MARKETS** for all listed tokens. It will go live 7 days after the launch of the **BYRON LABS** token.

BYRON CEX

Byron CEX focuses on much more than asset security.

Byron CEX stands on 3 pillars: Security, Liquidity and Trust.

Furthermore, **Byron CEX** operates with one of the lowest fees on the market, trades for just 0.01%.

The **Byron CEX** platform will be implemented with the main cryptocurrencies on the market and will begin its activities with more than 30 cutting-edge projects on the market. The platform will support all devices and provide multiple languages, offering a seamless user experience.

BYRON LAUNCHPAD

A lean **Launchpad** with the best services already tested and approved.

Best of all: the lowest rates on the market.

BYRON LAUNCHPAD

In the dynamic world of cryptocurrencies and blockchain, launching new projects is one of the most crucial and exciting steps. However, it is a complex task that involves a myriad of challenges, from financing to market exposure and building a solid support community in addition to the high costs involved in the entire process of opening the launchpad and promoting it.

This is where **Byron Launchpad** enters the scene as a platform dedicated to boosting the success of innovative crypto projects by bringing a Dex integrated into its platform that will allow the automatic launch and trading of assets in one place.

BYRON DEX

What if you could exchange your tokens in the same **LaunchPad** environment?

Now this will be possible with just 1 click.

BYRON MULTI PvP GAMES

At **Byron Multi PvP Games**, players control their games, unlike play-to-earn games, the games' liquidity pool will be fully protected, favoring the skill, strategy and intelligence of players.

May the best win and may those who are not so good develop to raise the level of competition.

A marketplace will be available to promote the game's internal market, facilitating the negotiation of items and NFTs.

BYRON DEX

Byron DEX is a decentralized finance (DeFi) automatic market maker (AMM) that allows users to exchange tokens, providing liquidity through farming and receiving fees in return.

Furthermore, **Byron DEX** is integrated with **Byron Launchpad**, making it easier for the user to get up to speed with launched assets.

After the projects are launched, one click is all the user will need to start negotiating or follow the evolution of newly launched projects.

BYRON MULTI PvP GAMES

We know that games have a start date and an end date, but it doesn't have to be that way.

Pure PvP games will be waiting for you at **Byron Multi PvP Games.**

BYRON NFT STAKING

NFTs need to be useful, NFTs should not be the target of speculation.

Byron Labs created a system for **staking NFTs** free from speculation or inflated prices.

BYRON LABS INCUBATOR

Does that idea of tokenization never leave your head, let alone the paper?

Our incubator will make your project viable at a fair price and with security for investors.

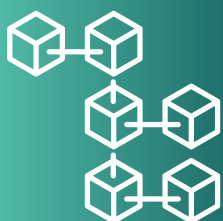

BYRON LABS INCUBATOR

Byron Labs Incubator is an incubator for new crypto projects that aims to launch in a professional and intelligent way.

To achieve this, **Byron Labs Incubator** has a team of mentors with extensive experience in the market, with several successful projects in its portfolio, enabling the creation of a sustainable structure so that new projects can be launched successfully, reaching the ideal target audience using the appropriate investment.

BYRON BLOCKCHAIN AND WALLET

A complete ecosystem without a blockchain is useless, which is why **Byron Blockchain** will fill this gap together with **Byron Wallet**, combining convenience and security.

BYRON NFT STAKING

Our NFTs will enable holders to influence ecosystem governance through the voting mechanism when choosing updates, projects, features, among others.

In addition to staking opportunities for a wide variety of NFTs, Byron will strategically partner with leading NFT projects, offering NFT holders exclusive access to staking opportunities and rewards.

BYRON BLOCKCHAIN AND WALLET

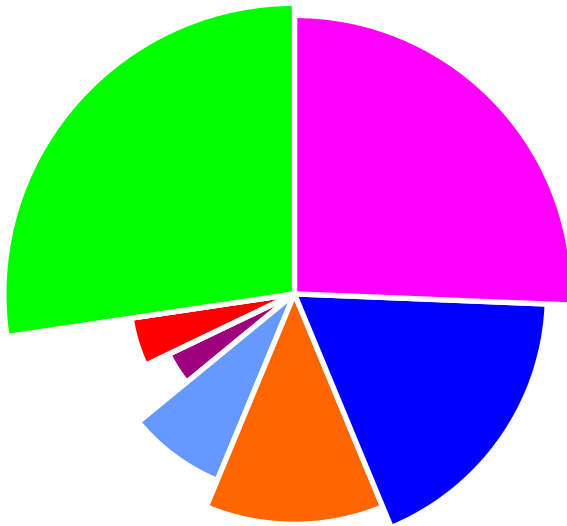

Byron Blockchain will truly revolutionize the world of decentralized finance with an uncompromising commitment to empowering individuals and businesses.

A **Byron Blockchain** will offer a secure and innovative infrastructure for a digital financial ecosystem.

A **Wallet** will also be delivered at this stage with a friendly and simple interface to democratize access to the crypto world by having an integrated payment gateway.
